EDUCATION

San Jose State University

B.S. Computer Science, GPA: 3.5/4.0

San Jose, CA

Aug. 2023 – May 2027

- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Object-Oriented Programming, Advanced Python, Web Programming, Database Management

EXPERIENCE

Apple

Oct 2023 – Present

Product Specialist

San Jose, CA

- Drove \$1M+ in sales by enhancing customer experience with hardware/software troubleshooting, solution selling, and customer success strategies
- Delivered tailored solutions for 150+ organizations, strengthening B2B relationships and fueling revenue growth via Apple's Business Team
- Reduced issue resolution time by 20% and boosted satisfaction by streamlining technical support workflows

Headstarter AI

Jul 2024 – Sep 2024

Software Engineer Fellow

Remote, US

- Built AI apps/APIs with Next.js, OpenAI, Pinecone, and Stripe, achieving 98% accuracy while optimizing a startup backlog to business needs
- Led a team of 3 fellows through full SDLC, applying MVC patterns to deliver scalable, maintainable projects from concept to deployment
- Applied Agile, CI/CD, Git, and microservice practices under mentorship from Amazon, Bloomberg, and Capital One engineers

Mission College

Aug 2023 – Dec 2023

Instructional Associate

Santa Clara, CA

- Mentored 80+ students in Java OOP, boosting course performance by 15% through 30+ review sessions and 1:1 guidance
- Guided 20+ Java projects averaging 95% by teaching OOP, data structures, and design patterns
- Helped students secure internships/research roles by fostering collaboration, Git-based version control, and project management best practices

PROJECTS

MindSync | React, TypeScript, Node.js, Express, PostgreSQL, OpenAI, AWS EC2

- Built MindSync, an AI-powered SaaS planner with React/TypeScript, Node.js/Express, and PostgreSQL, enabling 100+ users to track study sessions and reducing planning time by 50% via automated scheduling
- Integrated OpenAI API for personalized study tips and real-time updates, boosting engagement by 30%, retention by 25%, and earning a 4.9/5 satisfaction rating in beta testing
- Prepared platform for scale with Agile workflows, CI/CD, and AWS EC2 deployment, supporting 1,000+ users with production-grade reliability

SalesVision AI | Python, Pandas, NumPy, Upgini

- Built Gradient Boosting ML model with Upgini feature enrichment and Pandas/NumPy pipelines, improving sales forecast accuracy by 20%
- Predicted 3-month sales trends, reducing forecasting errors and optimizing inventory planning for data-driven decisions
- Designed scalable pipelines with modular code, clean architecture, and reproducible workflows for enterprise deployment

CryptoAPI | Python, FastAPI, RESTful API, Docker

- Developed production-ready REST API with FastAPI, delivering real-time crypto data via async, caching, and rate limiting, improving response times by 40% and cutting API calls by 60%
- Implemented input validation, error handling, and monitoring endpoints, ensuring 99.9% uptime during testing and secure API access
- Containerized with Docker and built 20+ automated tests, enabling reliable deployments and reducing bugs by 30%

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C/C++, SQL (Postgres), HTML/CSS

Frameworks/Tools: React, Node.js, Express, FastAPI, Docker, Git, AWS (EC2)

ML/AI: pandas, NumPy, Upgini, TensorFlow, PyTorch
